PROFILE

Computer & Software Engineering student and Data Science & AI Engineer focused on Machine Learning, Data Analytics, and Generative AI. CEO of Metrio, a company focused on data, analytics, and AI that help businesses grow. Completed a Data Science internship at Tectigon Academy in October 2026.

EXPERIENCE

CEO, METRIO | October 2026 - Present

- Leading Metrio, a company delivering data, analytics, and AI solutions that help businesses grow.
- Defining data-driven products and practical AI services for business growth.

DATA SCIENCE INTERN, TECTIGON ACADEMY | August 2026 - October 2026

- Practical work with Python, Pandas, SQL, and data analysis.
- Application of Machine Learning concepts, data preparation, and model evaluation.
- Use of Tableau and Microsoft Power BI for visualization and reporting.
- Exploration of Generative AI, LLMs, RAG, and Responsible AI principles.
- Received a professional reference from Tectigon Academy in recognition of my work and contribution during my internship.

EDUCATION

University of Prishtina - Faculty of Electrical and Computer Engineering (FIEK)

Program: Computer & Software Engineering

CURRENT EDUCATION | Currently studying

Për Programera - Full Stack Web Development | Course / Training

SELECTED PROJECTS

FinSightAI

AI-powered financial analysis platform for market and financial data insights.

GitHub | Live Demo

MS Doors and Windows

Responsive corporate website focused on product presentation and UI/UX.

GitHub | Live Demo

BioPackKos

Modern corporate web presence promoting eco-friendly packaging solutions.

GitHub | Live Demo

CryptoVision

AI-driven cryptocurrency analytics platform using machine learning to forecast market trends and price movements with real-time data pipelines.

GitHub | Live Demo

TEB-Banking-Financial-Analytics

Interactive Streamlit dashboard for TEB Bank financial performance, built with open UP Datasphere data and KPI/visual analytics.

GitHub | Live Demo

Data source: UP Datasphere

CERTIFICATIONS & TRAINING

- Intermediate Machine Learning - Kaggle
- Generative AI Fundamentals - Databricks
- Introduction to Machine Learning - Kaggle
- Python & Data Science - Tectigon Academy
- Introduction to Data Science - Cisco
- PCAP: Programming Essentials in Python - Cisco / NDG
- Linux Unhatched - Cisco / NDG
- Për Programera - Full Stack Web Development

TECHNICAL SKILLS

Programming
Python, SQL, Git, GitHub, Flask, FastAPI, VS Code

Data Science
Pandas, NumPy, Scikit-Learn, Data Analysis, Data Management, Data Preparation

Machine Learning
XGBoost, Gradient Boosting, Regression, Classification, Linear Regression, Decision Trees

Modeling
Cross-Validation, Pipelines, Feature Engineering, Categorical Encoding, Model Evaluation

BI & Visualization
Tableau, Microsoft Power BI, Excel

Data & Analytics
Data Cleaning, Exploratory Data Analysis (EDA)

Generative AI
LLM, RAG, AI Agents, Responsible AI
